2. The Docker daemon pulled the "hello-world" image from the Docker Hub. (amd64)  
3. The Docker daemon created a new container from that image which runs the executable that produces the output you are currently reading.  
4. The Docker daemon streamed that output to the Docker client, which sent it to your terminal.  
  
To try something more ambitious, you can run an Ubuntu container with:  
\$ docker run -it ubuntu bash  
  
Share images, automate workflows, and more with a free Docker ID:  
<https://hub.docker.com/>  
  
For more examples and ideas, visit:  
<https://docs.docker.com/get-started/>

## Question 2:

Create a docker file for the jobportal application and deploy it in Docker desktop application.

### DOCKERFILE:

```
1 FROM python:3.8-buster
2
3 WORKDIR /app
4
5 COPY requirements.txt /app/
6
7 RUN pip install -r requirements.txt
8
9 COPY . /app/
10
11 RUN cp .env.dev.sample .env
12
13 EXPOSE 8000
14
15 RUN chmod +x entrypoint.sh
16
17 CMD ["sh", "entrypoint.sh"]
```

### Question 3:

Create a IBM container registry and deploy helloworld app

or jobportapp. IBM CONTAINER REGISTRY

DEPLOYMENT:

OUTPUT:

## Question 4:

Create a Kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.

## CREATING KUBERNETES CLUSTER IN IBM CLOUD AND EXPOSING NODEPORT:

The screenshot shows the IBM Cloud Clusters console. At the top, there's a breadcrumb 'Clusters / mycluster-free' with a status 'Normal' and a warning 'Expires in 29 days'. There are buttons for 'Help', 'Kubernetes dashboard', and 'Actions...'. On the left sidebar, there are tabs for 'Overview', 'Worker nodes', 'Worker pools', and 'DevOps'. The 'Worker nodes' tab is selected, showing a table with one node.

Name	Status	Worker pool	Zone	Private IP	Public IP	Version
0000008c	Normal	default	Milan 01	10.144.187.51	159.122.179.68	1.23.12_1549

At the bottom of the table, it says 'Items per page: 25' and '1-1 of 1 item'.

## OUTPUT:

The screenshot shows a job portal website with a blue header 'Find Jobs'. Below the header, there are eight job listings arranged in a 2x4 grid. Each listing has a header image, a job title, a description, and an 'Apply' button.

- Web Developer**: Web Developer at Motive Company.
- Android Developer**: Android Developer at Believe Company.
- IoT Developer**: IoT Developer at Norway P&L Company.
- Pen Tester**: Pen Tester at AGC company.
- Computer & Information Research Scientist**: Computer & Information Research Scientist at GPSM company.
- Computer & Information Systems Manager (CISM)**: Computer & Information Systems Manager (CISM) at HVT company.
- Computer Hardware Engineer**: Computer Hardware Engineer at 7Tech company.
- Big Data Engineer**: Big Data Engineer at SMGT company.
